Systemic lupus erythematosus	
<b>0597</b>	<u>Efficacy of anifrolumab in systemic lupus erythematosus by overall and organ-specific SLEDAI-2K improvements: Results from the randomized, placebo-controlled phase 3 long-term extension study</u>
<b>0608</b>	<u>Efficacy of cenerimod in patients with high IFN-1 gene expression signature and high anti-dsDNA antibody levels: Post-hoc analysis from a phase 2 study</u>
<b>1489</b>	<u>Treatment with upadacitinib in patients with systemic lupus erythematosus results in the inhibition of B-cell-related biomarkers: Analysis of the M19-130 (SLEek) phase 2 study</u>
<b>2328</b>	<u>Deucravacitinib, an oral, allosteric, tyrosine kinase 2 (TYK2) inhibitor, in patients with active systemic lupus erythematosus: Patient-reported outcomes in a phase 2 trial</u>
<b>2487</b>	<u>Phase 2 safety and efficacy of subcutaneous (s.c.) dose ianalumab (VAY736; Anti-BAFFR mAb) administered monthly over 28 Weeks in patients with systemic lupus erythematosus (SLE) of moderate-to-severe activity</u>
<b>2488</b>	<u>Efficacy and safety of ABBV-599 high dose (Elsubrutinib 60 mg and Upadacitinib 30 mg) and upadacitinib monotherapy for the treatment of systemic lupus erythematosus: A phase 2, double-blind, placebo-controlled trial</u>
<b>L13</b>	<u>An open-label, multicenter, phase 1/2 study to assess safety, efficacy and cellular kinetics of YTB323, a rapid manufacturing CAR-T Cell therapy targeting CD19 on B cells, for severe refractory systemic lupus erythematosus: Preliminary results</u>

Lupus nephritis	
<b>0595</b>	<u>Renal involvement in patients with systemic lupus erythematosus treated with anifrolumab compared with placebo over a 4-year period</u>
<b>0782</b>	<u>Comparison of dual-immunosuppressive therapy with a voclosporin-based, triple-immunosuppressive regimen for lupus nephritis in the ALMS and AURORA 1 studies</u>
<b>0784</b>	<u>Kidney-related outcomes and steroid-sparing effects in patients with active lupus nephritis treated with obinutuzumab: A post hoc analysis of a phase 2 trial</u>
